

مثال ٠٠

لتوزيع طبيعي وسطه الحسابي ١٥٠ وانحرافه  $X > 200$  أوجد احتمال

المعياري ٢٨

حسب الصيغة (Z) نحول القيمة ٢٠٠ (توزيع طبيعي) لقيمة معيارية

السابقة

$$Z = (x - \mu) \div \sigma = (200 - 150) \div 28 = 50 \div 28 = 1.79$$

Z = (١,٧) من عمود

من الافقي (٠,٩)

0.9633 من الجدول نجد أن ١,٧٩ يقابلها القيمة
