المحاضرة الثانية مدخل الى اللغويات
[أسئلة مراجعة مجهود شخصي - مدخل الى اللغويات - د.أحمد الخطيب]

1) Communicative signals:

- through signals that you have not intentionally sent
- While this theory is based on that speech developed from the instinctive sounds
- **It happens when someone intentionally use language to tell this person something.**
- Is it possible that a creature could learn to communicate with humans using language

2) Informative signals

- It happens when someone intentionally use language to tell this person something.
- not through a culture with other genes from parental is acquired Language speakers
- It is also called creativity and open-ended
- **through signals that you have not intentionally sent**

3) Both of communication human language are animal a considered to be means of unintentionally communication.

- True
- **Flase**

4) Properties of human language

- Displacement
- Arbitrariness
- Productivity
- **All of the above**

5) Properties of human language

- **Duality**
- linguistics
- Informative signals
- Communicative

6) Displacement

- There is no natural connection between a linguistic form and its meaning This connection is arbitrary
- Language is acquired through a culture with other speakers not from parental genes
- It is also called creativity and open-endedness

- **it allows language users to talk about things and events not present in the immediate environment**

7) Cultural transmission

- **Language is acquired through a culture with other speakers not from parental genes**

- There is no natural connection between a linguistic form and its meaning This connection is arbitrary

- It is also called creativity and open-endedness

- it allows language users to talk about things and events not present in the immediate environment

8) some words in English seem to be more arbitrary such and slurp.

- True

- **Flase**

9) Productivity

- Innateness hypothesis

- Systematic and scientific study

- **creativity and open-endedness**

- Duality

10) Non-humans are born with a set of specific signals that are produced instinctively.

- **True**

- Flase

11) From these experiments and others, it was conciuuded that non human primates do not actually have the physical and structural ability fvocal tract) to articulate the sounds used in speech

- **True**

- Flase

12) Chimpanzees, apes and gorilla can all communicate with a wide range of vocal calls, but they just can make speech sounds like humans

- True

- **Flase**

13) Chimpanzees did not perform linguistically on a level comparable to a human child.

- **True**

- Flase

14) Yet, there is a still difference in term of 'using language between humans and non-humans.

- **True**

- Flase

15) Animal communication lacks productivity which can be described

- creativity

- Productivity

- **fixed reference**

- Arbitrariness
