Monster Cities قطعة من الكتاب بعنوان

Are big cities wonderful places? Are they terrible? There are different ideas about this. William H. Whyte writes books about cities. He is happy in a crowded city. He loves busy streets with many stores and many people. He likes the life in city parks and restaurants. Many people don't like big cities. They see the large population of cities and they are afraid. Many cities are growing very fast. They are "monster" cities. (A monster is a big, terrible thing). In some countries, there are no jobs in small towns. People go to cities to work. For example, 300,000 people go to Sao Paulo, Brazil, every year. In china, about 183,000 people move to Beijing from the countryside every year. Sao Paulo and Beijing are both megacities. A megacity is a very, very big city. It includes the main city and cities and towns around it. People density is the number of people in one square mile (2.59 square kilometers). There are big problems in megacities. The first battle of the American Revolution occurred at Lexington, Massachusetts in 1775. The American colonists were angry about numerous taxes issued by the British king. In 1776, the colonists issued the Declaration of Independence, a document written by Thomas Jefferson that outlined America's intention to become a new country separate from England. England wanted to maintain control of America, and vowed to fight the colonists. The war lasted eight long years. The Americans won many important battles such as those at Saratoga, Washington and Yorktown. Many American heroes emerged such as George Washington, Thomas Jefferson and Benjamin Franklin. Finally, in 1781, the British surrendered at Yorktown, Virginia and a new nation was born two years later.
