### Question3:

**(A) Reading Comprehension 1: Read the following passage and answer the questions below.**

Marriage is often not easy. Maybe man and woman love each other, but they argue . They get angry. Later they apologize, but it happens again and again. What's the problem? Are men and women really very different.

Deborah Tannen says yes, men and women are very different. Tannen teaches at Georgetown University in Washington, D.C. She writes books about the ways people talk. She believes that men and women talk- and think- in different ways. She tells about some differences in her book, You Just Don't Understand.

The differences, Tannen says, begin when men and women are children. Very young boys and girls are similar to each other. In other words, they like many of the same things and play in the same ways. They aren't very different. But then there is a change. When children in the United States are five or six years old, boys usually play in large groups. One boy gives orders . For example, he says," Take this," ' Go over there". He is the leader. Boys also brag . In other words, they say good thing about themselves. But girls there usually play in small groups or with one other girl. A girl's best friend is her very good friend and important to her. Girls often don't give orders; they give suggestions.

## B: Reading Comperhension 2:

## القطعة تتحدث عن نبات الصبار الصحراوي

The cactus is a plant which grows in very hot, dry places. They do not have leaves. Instead, <sup>61</sup>they have spiny needles which stick out of their stems. There are many shapes of the cactus. <sup>66</sup>Some are small and round. <sup>64</sup>Others are tall like columns or pillars. Some are shaped like tubes or bells. Some are shaped like wheels. Some grow as trees or shrubs. Others grow as ground cover. Cactus flowers are big, <sup>66</sup>and some of them bloom at night. Their flowers come out at night because they are pollinated by insects or small animals that come out at night. <sup>68</sup>Insects and small animals carry pollen from one cactus to another.

<sup>67</sup>Most cacti live in North and South America. Others live in Africa, Madagascar, and Sri Lanka. Cacti do not have very large leaves because large leaves would allow the water to evaporate. When water evaporates, <sup>62</sup>it changes from a liquid to a gas. When it becomes a gas, it is light enough to move through the air. That would be bad for the cactus because the cactus needs the water to live.

Some cacti have waxy coatings on their stems, <sup>65</sup>so that water will run down the stem to the roots. <sup>63</sup>Cacti can absorb water from fog in the air, since it does not rain very much in the desert. Most cacti have long roots which can spread out close to the surface so they can absorb a lot of water on the occasions when it rains.

Families in almost every country are changing. This is true in rich countries and poor ones. It is true in Africa, the Americas, Asia and Europe. All over the world, families are getting smaller.

In North Africa , in the past, many people lived in extended families. Fifty to hundred people lived together in a group of houses.

These were all family members- grandparents, aunts, uncles, cousins, children, and grandchildren. But now this traditional family is breaking into smaller groups.

The traditional family in Mexico was also big. One generation ago, the average Mexican woman had seven children. Today, she has an average of only 2.5 children. Now , without so many children, families don't need to spend so much money on basics, such as food, clothing and housing.
