

.1

The Cherokee were a dominant tribe that lived in parts of modern-day Tennessee, Georgia, the Carolinas, Alabama and Kentucky. Men and women had specific gender roles: Men were in charge of war, hunting, and diplomatic relations, while females were in charge of the home, property, and family. Sometimes, Cherokee women participated in war too. The Cherokee were divided into seven large clans: Long Hair, Paint, Bird, Wolf, Wild Potato, Deer, and Blue. Babies would be born into their mother's clan. Villages were comprised of individuals from different clans. A man and a woman from the same clan could not marry.

?Which of the following was not a Cherokee family clan -

إجابة

D. Coyote .B

_____ The Great Pyramid was built in -3

إجابة

A. a very hot area .A

1. Read the following passage and answer the questions bellow

The Loggerhead Sea Turtle is named for its large head and blunt jaw.

This huge sea turtle can grow to 800 pounds (though the average turtle is about 200 pounds) and three and a half feet in length. It is the largest hard-shelled turtle in the world. The carapace (shell) and flippers are reddish brown and the plastron (lower shell) is yellowish.

The carapace has five lateral scutes and five central scutes. Scutes are hexagonal sections of the carapace. Underparts are white or whitish. These incredible turtles have powerful flippers that can propel them through the water at speeds of up to 16 miles per hour.

The Loggerhead Sea Turtle has a life span of up to 50 years in the wild.

?Why is this species named Loggerhead Sea Turtle-

إجابة

.C. It has a large head .D
