

الواجب الأول:

3	درجة الواجب الحاصل عليها:
.document how a language is actually used by its native speakers .....	
<input type="radio"/> Prescriptive grammars)	
<input checked="" type="radio"/> Descriptive grammars)	
<input type="radio"/> Psycholinguistics)	
<input type="radio"/> Neurolinguistics)	
is the actual use of linguistic knowledge .....	
<input type="radio"/> Linguistic competence)	
<input checked="" type="radio"/> Linguistic performance)	
<input type="radio"/> Language creativity)	
<input type="radio"/> None of the previous items is right)	
:Language processing is subconscious, this means	
<input checked="" type="radio"/> It happens without the mental capacities being fully active)	
<input type="radio"/> The mental capacities have to fully active during language processing)	
<input type="radio"/> Language processing is not necessary when speaking)	
<input type="radio"/> None of the previous items is correct)	

الواجب الثاني:

3	درجة الواجب الحاصل عليها:
Lexical entries are organised ..... in the brain	
<input checked="" type="radio"/> according to their meaning and sound)	
<input type="radio"/> alphabetically)	
<input type="radio"/> according to length of the word)	
<input type="radio"/> chronologically)	
:The tip of the tongue phenomenon means	
<input type="radio"/> being unable to remember words due to head injury)	
<input type="radio"/> being unable to produce words due to head injury)	
<input checked="" type="radio"/> remembering some details about a word, but not the word itself)	
<input type="radio"/> remembering the meaning of a word in short-term memory)	
:Lexical decision and priming experiments are conducted to	
<input type="radio"/> Check peoples' fluency)	
<input type="radio"/> Check peoples' response to potential threats)	
<input type="radio"/> Check peoples' communication skills)	
<input checked="" type="radio"/> Check peoples' access to lexical entries)	

الواجب الثالث:

:Which of the following is not an indication that a communication system is based in the biology of its users

- Being species specific) ☐
- Being universal to members of the species) ☐
- Being made of sounds and symbols) \* ☒
- Being affected by the environment) ☐

:Aphasia is

- A language impairment following an injury to the brain) \* ☒
- Language fluency) ☐
- Language accuracy) ☐
- None of the previous) ☐

:Supra-segmental Information in the signal may include features like

- Variation in duration) ☐
- Variation in pitch) ☐
- Variation in stress) ☐
- All of the above) \* ☒

:Working memory is

- Speech production) ☐
- Speech perception) ☐
- Long-term memory) ☐
- Short-term memory) \* ☒
