

Chapelle argues that..... should be carried out using the theories of second. .1.

: None of the above

1. 2- There are two stages in chapelle`s(2001) sscheme which are.

The judgmental stage and empirical stage :

Choose the incorrect sentence. .3-

:The criteria of chaplle`s evaluation scheme includes language learning potential and practicality.

4- The purpose of the investigation in corpus linguistics can be ...

: All the above

5- A..... is a collection of language material, made in some principled way , either on ??? or written in hard copy (e.g. books,student essays)or in electronic form.

:corpus

6-. in the, chapelle (2001) analyses the software using two levels: the program teacher

: judgmental stage

. 7-is a program which generally runs through the text (or a precompiled index ????)

: search engine

.8- users of corpora can be ...

: all the above

9- Choose the correct sentence .

: descriptive grammarians improve their descriptions to fit the facts of

actual use of constructions.

10-Computational linguists can show

: if their words are actually used, and how often , and how to improve dictionary entries

11- Chapelle argues that CALL software should have the ability to let students `notice` their errors as this would help them to

:shift to `a syntactic mode` that aids in internalizing the new form

. 12- Chapelle (2001) and Skehan (1998) suggest some conditions which might characterize a task that draws learners `attention to the form` ; these conditions are

: `modified action and `modified output`

. 13- usage, development, and evaluation are

: unimportant stages in the CALL process

.14- the CALL history goes back to ...

: The era of powerful Macs and PCs

15- The UUEG software mainly facilitates learning

: grammar and structure

. 16- A CALL software is

: Any potential software usable by language learners in connection with learning

. 17- Evaluation can be defined as

: deciding on the fitness of something for certain purposes

. 18- We call a judgment in which a teacher subjectively judges an application an

: Expert judgment

.19- in grammar , a `tree bank` refers to

: A collection of parsed sentences

.20- Natural language processing can best be applied in the field of
: computational linguistics

. 21- choose the incorrect sentence
: NLP is studied because helps in communication with computers

. 22- The NLP Scientific Goal identifies the needed for an agent to exhibit various forms linguistic behavior
: computational machinery

.23- Machine translation , speech processing , question answering and summarization are ..
: some applications of natural language processing

.24- According to Skehan, CALL materials must at a level that is neither too simple nor too difficult
: suit the target teacher , and accordingly its tasks should not be set

.25- The Engineering goal of NLA designs, implements, and tests systems that
: process natural languages for practical applications

. 26- The CALL checklist was inspired mainly by
: Odell (1986)

.27- External pre-requisites of a CALL software usually needs to be
: prior to any consideration of areal theoretical value

. 28- Some aspects of software that need to be looked at separately for evaluation are
Price, platform and management required , prerequisite software , etc

. 29- Some output features of a CALL software are
: Sound, graphics, video, written fonts, screen layout , etc .

. 30- Chapelle(2001) points out that Refers to the degree of
`beneficial` focus on form that the software provides to its learners
: Language Learning Potential

.31- The..... Contribute to `input enhancement` of a CALL software
: None of the above

. 32- what we call a `CALL software` can involve any software or
programs that is ...
: potentially usable by language learners in connection with learning
\teaching

. 33- the CALL software can often be analogous to
: an individual exercise or task in a book

. 34- Unlike a CALL software or a program which can usually give some
response to the users , a book
: is not typically dynamic or interactive

. 35- Books When they are compared to a CALL software
: are limited in its media capability

. 36- some CALL softwares allow `authoring`: i.e.
: the teacher can not put in his / her own choice of text , words etc

. 37- Chapelle shows that `Evaluation of CALL is a
: situation –specific argument

. 38- You cannot really evaluate a CALL software without also thinking
of how this software will be used in the
: learning and teaching process

. 39- The software displays message in red at the top of the
exercise when all of the answers are correct

: a `well done`

. 40- The In a CALL software is of significance because it helps students focus on form

: coloured feedback

. 41- The evaluation of CALL materials prior to purchasing them will

: help you decide whether to buy them or not

. 42- Teachers should be good at CALL software because there is a lot of poor materials/software about

: evaluating

. 43- Curriculum designers are less likely to extend this activity to CALL , so this ?? to the teachers to do

: who evaluate to choose a suitable course books for a course

. 44- means relying on one`s own judgment / experience , and maybe published consensus on what should be there , what is good or bad , or AL theory

: introduction

. 45- it can be useful to make when evaluating a CALL program, to see how the program responds.

: deliberate mistakes

. 46- Some key things that should not be forgotten when using the checklist approach are

: to have as many detailed subsections as possible

To be explicit about where the list comes from :

To be explicit about which existing list is being used/adapted:

All the above:

. 47- previous research , long & Robinson 1998 shows, has proven that highlighting grammatical forms and writing them in italicized , bold letters are

: very effective

. 48- Borg (1999) points out that error awareness helps students to
: monitor and self-correct their use of language.

. 49- find out how words are actually used and improve dictionary
entries
: Dictionary makers.

. 50- Rather than using global judgment, one can breakdown this into a
.....
: checklist

ملاحظه : النقطتين فوق بعض هي الاجابه
بالتوفيق للجميع..
